

Legend By Belanger™ Tunnel Series

Trusted. Proven. Every Single Day.

DRIVE | CLEAN

The DuraTrans® 14.5" wide conveyor accommodates today's wider performance and sport wheels to help operators run with confidence, so they can keep doing what's important...reliable vehicle processing.

Sudzer® BL delivers tons of BUBBLES for an unparalleled customer experience, all while using as little as 1/2 oz. of chemical.

Designed as a dedicated horizontal surface washer, the Whisper Wheel® excels at cleaning hoods, roofs, and trunk lids – all while providing a super-quiet customer experience.

LEGEND

By Belanger™

Never Settle.

From the company that introduced the world's first equipment specifically designed for soft-cloth car washing: Legend By Belanger™ tunnel series draws on decades of engineering know-how, while delivering continued innovations no one can match.

Rather than resting on the soft-cloth achievement, Belanger used its momentum to propel the company's ongoing innovation. The same inquisitive thinking, refusal to take current practices for granted, and constant drive to find better ways to wash vehicles have since defined Belanger and its equipment.

The Equipment.

Great Vehicle Wash Equipment Starts With A Vision ...

- Design Goals – Exceptional Cleaning, High Uptime, Low Maintenance.
- We look forward, but design for backward compatibility where possible.
- We strive for cross-platform design to simplify training, inventory and ordering.
- Belanger innovations have earned over 130 U.S. Patents to date.

Built on the strength of our aircraft-grade aluminum framework, Legend By Belanger™ equipment features a minimum number of moving parts. Where motion is required, each component relies on automotive-grade bearings or lube-free pivot points – for minimal maintenance needs and easy servicing.

Be Memorable.

Anyone can equip a tunnel to produce clean cars. The savvy operator goes beyond that – to produce a memorable experience. Done right, a car wash should appeal to the senses, while reassuring customers the wash is safe for them and their vehicles.

All Legend By Belanger™ tunnel wash components are designed around a very flexible wash configuration model that enables you, the operator, to build the wash solution that best meets you and your customers' needs.

At 200+ vehicles per hour, Belanger's patented QuickFire® is the market's most powerful front, side, and rear vehicle washing wrap.

The DuraShiner® CVBR tire shiner is designed for longer wear and less tear. The soft-tipped nylon brush easily conforms to all tire sizes, including the most rugged truck tires, to deliver the perfect shine.

Belanger's touchless dryers are engineered with the latest in energy-efficient and safety technology and come in a broad variety of design and HP configurations.

TRUSTED SINCE 1969

Whether you're a seasoned car wash operator or a first-time investor, one thing is true: the equipment you select for your wash will have a major impact on your businesses' success.

Your equipment needs to clean cars the way your customers want to wash their cars.

The equipment you choose should work to support your marketplace's washing preferences, meeting the needs of your customers, and your business, at your location.

As a full-line equipment manufacturer, Belanger makes more types of vehicle washes than anyone else – including conveyORIZED tunnels, touchless and soft-touch automatics, drive-thru and large vehicle washes.

Which means we'll work with you on the best format for your location's success – not push a 'one size fits all' approach.
